WORK HISTORY

Fullstack Python/Django Developer, 04/2024 - Current   **2024 - Present**
Pentagon Softwares - Kerala,Kochi, India
In my role as a full-stack Python Django web developer at Pentagonsoftwares in Kochi, I led the development and launch of a dynamic web application, improving user experience and backend efficiency. I collaborated with cross-functional teams, participated in client meetings, and implemented advanced features, contributing to the successful completion of key projects and initiatives.

                                                                                                     2023- 2024

Full Stack Web Developer Python/Django, 08/2023 - 04/2024
Gedexo Technologies - India,Kerala, Malappuram
 2023 -2024 Present Collaborated with clients and internal teams to achieve project objectives, ensuring seamless website development. Provided ongoing maintenance and support, while gaining insights into the company's software programming operations.

PROJECTS

Loqz

I developed "Loqz," a comprehensive website for a high-level loq company using HTML, CSS, JavaScript, jQuery, Python, and Django. I implemented product displays, contact forms, dealership forms, testimonials, and detailed product and blog pages. Throughout the project, I ensured smooth functionality and user experience. "Loqz" showcases my proficiency in web development, delivering robust solutions in a collaborative environment. [loqz.in](#)
